NUFASHOND FABRIC TIP FLAT LACES

Water Repellant

Made of 120 separate strands (heavier) very best mercerized cotton, very tightly braided and the yarn is treated by a special process which makes it water repellant and adds materially to the life and strength of the lace. Does not gather dirt; clings to the eyelets and hooks better, giving a more even tension; stays tied better. The 27 and 40-inch lengths are just the laces for men's high grade shoes, with regular eyelets, and the 90 and 108-inch are the proper laces for the finer high cut boots such as the oil and mining men and sportsmen wear. Put up in dozen pair cartons with cellophane top and a gross in a box.
